Aqualis Timber Prep

Timber Prep is an environmentally friendly cleaner used on weather beaten and aged wood surfaces. It has been designed to effectively restore grey timber to its natural look. Unlike bleach based cleaners, its unique formulation does not destroy natural timber fibres. **Timber Prep** removes ground in dirt and contaminants reviving aged weathered timber to its natural state ready for a fresh coat of **H₂Oil Timber**.

Properties

- **Product** **Timber Prep** Water based timber cleaner/restorer
- **Product Code** 855TP-1003
- **Consistency** liquid
- **Thinning** No thinning required
- **Environment** Made from environmentally friendly biodegradable materials, safe for plants
- **Cleaning** Wash up with water
- **Container Size** 1Lt, 4Lt
- **PH** Acidic
- **Coverage Diluted** Substrate Dependent.
Theoretical 5-10 m²/Lt
- **Flash Point** Non-Flammable
- **Shelf Life** 12 months in original packaging

Benefits

- Removes ground in dirt, grime and weathered grey fibres restoring timber to its natural look.
- Cleans exterior painted timber surfaces which require a prep clean prior re-painting
- Neutraliser for surfaces cleaned with bleach or caustic type cleaners preventing discolouration of timber
- Removes rust stains from surfaces such as timber, concrete, stone or plastic
- Cleaner for discoloured stone and stained cement
- Cleans all traces of weathering attributed to mould, mildew, or pollution etc
- Helps remove tannins and oils from timber prior painting
- Fast acting
- Suitable for use on all soft woods and hardwoods

APPLICATION

Ensure all safety Instructions are followed as per **Material Safety Data Sheet**, wear safety goggles, gloves, and protective clothing. Cover all areas which require protection with plastic sheeting and thoroughly wet all plants and shrubs in the designated cleaning vicinity. Take caution when walking on wet surfaces especially steps and stairs as they will become slippery. Timber Prep may dull painted surfaces or metal fixtures if left on for long periods of time. Quickly rinse or wipe off with a wet cloth as required.

Applicators

Use soft brush, hard bristle/nylon brush, broom, mop, low pressure spray

Cleaning Wood and masonry

Dilute Timber Prep as per label instructions

Thoroughly wet the substrate surface with clean water. Apply **Timber Prep** solution with suitable applicator liberally over substrate and scrub with a stiff synthetic/nylon brush and allow standing for 10- 20 min. Again, scrub the surface with a hard bristle brush whilst rinsing with garden hose or gerni water jet. If required repeat above procedure.

Wood - Allow to dry thoroughly prior application of **H₂Oil Timber** water based exterior finish.

Masonry - Allow drying for at least 24 hours or until the moisture content satisfies the finish topcoat's painting requirements.

Rust Stains

Thoroughly wet the substrate surface with clean water. Apply **Timber Prep** with suitable applicator liberally over substrate and scrub with a stiff synthetic/nylon brush working in to the rust stain and allow to sit for 10min. Again, scrub the surface with a hard bristle brush whilst rinsing with high pressure hose or gerni water jet.

Nail Stains

Thoroughly wet the substrate surface with clean water. Apply **Timber Prep** with suitable applicator liberally over the nail stain and scrub with a stiff synthetic/nylon brush. Once the stain has disappeared, scrub the surface with a hard bristle brush whilst rinsing with high pressure hose or gerni water jet.

Precautions

Not recommended for use on composite wood. For washing composite wood surfaces we recommend using Aqualis **Composite Bright**.

Do not use on Aluminium, ensure all aluminium windows and doorways/frames are covered with plastic sheeting to prevent discolouration or etching.

Thoroughly wash or wipe effected areas with plenty of water.

Storage

Store in original tightly sealed plastic packaging. Do not store in metal containers and keep out of reach of children.
